#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

1. The office action is in response to After Final filed 2/26/2010.
2. Claims 4 and 6 are now pending.
3. In view of Applicants amendments, Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kamiyama et al. (6,043,940) in view of Gopalan et al. (6,211,999) are withdrawn.
4. Applicant's arguments with respect to claims 4 and 6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102/103***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4 and 6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ogihara et al. (4,898,641)

Ogihara et al. discloses a single crystal wafer of lithium tantalate comprising lithium tantalate and a birefringence of not higher than 0.0006 [abstract]. Ogihara further discloses the single crystal wafer used in device that include a lens such as vcr resonators and other optical devices [col.1;ln20-25]. It is well known in the art that lithium tantalate is made from lithium oxide and tantalum oxide.

Ogihara is silent on the ratio of lithium oxide and tantalum oxide. It is noted that the birefringence is substantially identical to the instant claim and depends on the ratio of lithium oxide and tantalum oxide. Therefore, the composition would not have mutually exclusive properties MPEP 2112.02II. Therefore the claimed ratio is assumed to be inherent to the composition of Ogihara et al.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
